FUND SUMMARY

Investment Objective: The Teberg Fund (the “Fund”) seeks to maximize total return (capital appreciation plus income).

Fees and Expenses of the Fund: This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund.

Shareholder Fees (fees paid directly from your investment)	
Maximum Sales Charge (Load) Imposed on purchases (as a percentage of offering price)	None
Redemption Fee (as a % of amount redeemed)	None
Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	1.25%
Distribution and Service (12b-1) Fees	0.25%
Other Expenses	0.68%
Acquired Fund Fees and Expenses ⁽¹⁾	0.32%
Total Annual Fund Operating Expenses	2.50%
Fee Waiver and Expense Reimbursement ⁽²⁾	(0.43)%
Total Annual Fund Operating Expenses After Fee Waiver & Reimbursements	2.07%

- (1) Acquired Fund Fees and Expenses are the indirect costs of investing in other investment companies. The operating expenses in this fee table will not correlate to the expense ratio in the Fund’s financial highlights because the financial statements include only the direct operating expenses incurred by the Fund, not the indirect costs of investing in other investment companies.
- (2) First Associated Investment Advisors, Inc. (the “Adviser”) has contractually agreed to waive all or a portion of its management fees and pay expenses of the Fund to ensure that Net Annual Fund Operating Expenses (excluding any front-end or contingent deferred loads, brokerage fees and commissions, acquired fund fees and expenses; borrowing costs (such as interest and dividend expense on securities sold short), taxes, and extraordinary expenses, such as litigation expenses (which may include indemnification of Fund officers and Trustees, contractual indemnification of Fund service providers (other than the Adviser))) do not exceed 1.75% of the Fund’s average daily net assets (the “Expense Cap”). The Expense Cap will remain in effect through at least July 31, 2019, and may be terminated only by the Board of Trustees. The Adviser may request recoupment of previously waived fees and paid expenses from the Fund for three years from the date they were waived or paid, if such recoupment can be achieved within the foregoing expense limits or within the expense limits in place at the time of recoupment, whichever is lower.

Example: This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 Years</u>
\$210	\$738	\$1,292	\$2,804

Portfolio Turnover: The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Fund’s performance. During the most recent fiscal year, the Fund’s portfolio turnover rate was 41% of the average value of its portfolio.

Principal Investment Strategies: To achieve the Fund’s investment objective, the Adviser invests the Fund’s assets primarily in shares of any number of other no-load and load-waived mutual funds, which may include exchange traded funds (“ETFs”), sometimes referred to in this Prospectus as “Underlying Funds.” The Underlying Funds pursue their own investment objectives by investing in particular types of securities (e.g., equity or debt), emphasizing a particular investment style (e.g., value or growth), or emphasizing certain industries or sectors. Some of the Underlying Funds invest in the stocks of small, medium and large capitalization domestic or international companies while others invest in fixed-income securities of varying maturities (e.g., short-term, intermediate or long-term) and credit qualities (e.g., investment grade or lower than investment grade), including government and corporate bonds, as well as high-yield securities or “junk bonds.” Over time, the Fund’s asset mix is likely to consist of a combination of equity, fixed-income, or money market funds; however, the Fund reserves the right to invest all of its assets in any one of these asset classes depending upon market conditions and to actively trade in Underlying Funds. Additionally, the Fund may commit up to 80% of its net assets at any given time to Underlying Funds that invest in high-yield or “junk bond” securities.

The Adviser is responsible for constructing and maintaining the allocation of the Fund's assets in a timely combination of Underlying Funds that maximizes the Fund's total return. The Adviser uses a "top down" approach to select Underlying Funds that begins with an analysis of the general economic outlook. The next step is to analyze historical market patterns with the goal of determining which categories and sectors are likely to perform well in certain economic conditions. Next, the Adviser analyzes the historical returns of a broad universe of mutual funds and selects those that exhibit the potential for superior growth based on factors including, but not limited to, their exposure to risk, historical performance, downside records, and competitive position.

To determine when to sell Underlying Funds, the Adviser analyzes how the general economic outlook could impact certain categories and sectors based on historical market patterns. The Adviser continuously monitors the pricing of each Underlying Fund to identify if it is performing as anticipated with the goal of selling an Underlying Fund when it appears to have reached its expected growth potential. The Adviser may sell an Underlying Fund prior to reaching this growth level if the economic outlook changes or it appears that the Underlying Fund is not reacting to current conditions as it has to similar periods in the past.

Because the Fund is a "fund of funds," you will indirectly bear your proportionate share of any fees and expenses charged by the Underlying Funds in which the Fund invests in addition to the expenses of the Fund. Actual Underlying Fund expenses are expected to vary with changes in the allocation of the Fund's assets among various Underlying Funds.

The Fund's investment strategy typically results in a high portfolio turnover rate primarily due to the Adviser's active management of the Fund's investments.

Principal Investment Risks: As with all mutual funds, there is the risk that you could lose money through your investment in the Fund. The Fund is not intended to be a complete investment program. Many factors affect the Fund's net asset value ("NAV") and performance.

- **Cash Position Risk:** If the Fund invests a substantial portion of its assets in money market instruments for extended periods of time, including while the Fund is investing for temporary defensive purposes, it could reduce the Fund's potential return and prevent the Fund from achieving its investment objective, as the limited returns of cash or money market instruments may lag other investments in a strong market.
- **Fixed Income Risk:** Typically, a rise in interest rates causes a decline in the value of fixed income securities. The value of fixed income securities typically falls when an issuer's credit quality declines and may even become worthless if an issuer defaults. Recently, interest rates have been historically low. Current conditions may result, in a rise in interest rates, which in turn may result in a decline in the value of the bond investments held by the Fund. As a result, for the present, interest rate risk may be heightened.
- **Industry or Sector Emphasis Risk:** To the extent that an Underlying Fund invests a substantial portion of its portfolio in a particular industry or sector, such Underlying Fund's shares may be more volatile and fluctuate more than shares of an Underlying Fund investing in a broader range of securities.
- **Junk Bond Risk:** Lower-quality bonds, known as "high yield" or "junk" bonds, present greater risk than bonds of higher quality, including an increased risk of default. An economic downturn or period of rising interest rates could adversely affect the market for these bonds and reduce the Fund's ability to sell its bonds. The lack of a liquid market for these bonds could decrease the Fund's share price. These bonds are speculative investments.
- **Management Risk:** The Adviser's judgment about the attractiveness, value and potential appreciation of particular Underlying Funds, asset classes and securities in which the Fund invests may prove to be incorrect and may not produce the desired results.
- **Market Risk:** Overall securities market risks may affect the value of individual instruments in which the Fund invests. Factors such as domestic and foreign economic growth and market conditions, interest rate levels, and political events affect the securities markets. When the value of the Fund's investments goes down, your investment in the Fund decreases in value and you could lose money.
- **Portfolio Turnover Risk:** A higher portfolio turnover will result in higher transactional and brokerage costs associated with the turnover, which may reduce the Fund's return, unless the securities traded can be bought and sold without corresponding commission costs. Active trading of securities may also increase the Fund's realized capital gains or losses, which may affect the taxes you pay as a Fund shareholder. The Fund is expected to have a high portfolio turnover rate.
- **Small and Medium Capitalization Company Risk:** Securities of small and medium capitalization companies may be subject to more abrupt or erratic market movements than those of larger, more established companies or the market averages in general.

- Underlying Fund Risk:** Underlying Funds are subject to investment advisory and other expenses, which will be indirectly paid by the Fund. As a result, the cost of investing in the Fund will be higher than the cost of investing directly in other investment companies and may be higher than other mutual funds that invest directly in securities. The market value of ETF shares may differ from their NAV. The strategy of investing in Underlying Funds could affect the timing, amount and character of distributions to you and therefore may increase the amount of taxes you pay. When the Fund invests in Underlying Funds that use margin, leverage and short sales, an investment in the Fund may be more volatile than investments in other mutual funds. Each investment company and ETF is subject to specific risks, depending on the nature of the fund.

Performance: The bar chart and performance table show the variability of the Fund's returns, over time which is some indication of the risks of investing in the Fund. The bar chart shows performance of the Fund's shares for each of the past 10 full calendar years. The performance table compares the performance of the Fund's shares over time to the performance of a broad-based market index and a supplemental index. You should be aware that the Fund's past performance (before and after taxes) may not be an indication of how the Fund will perform in the future. The Fund acquired all of the assets and liabilities of The Teberg Fund (the "Predecessor Fund") in a tax-free reorganization on December 13, 2013. In connection with this acquisition, shares of the Predecessor Fund were exchanged for shares of the Fund. The performance information set forth below reflects the historical performance of the Predecessor Fund shares. Updated information on the Fund's results can be obtained by visiting www.tebergfund.com.

Calendar Year Total Returns (%) as of December 31

The Fund's year-to-date return as of June 30, 2018, was 1.43%. During the period of time displayed in the bar chart, the Fund's highest quarterly return was 19.24% for the quarter ended 6/30/2009, and the Fund's lowest quarterly return was (15.42)% for the quarter ended 12/31/2008.

Average Annual Total Returns
(For the periods ended December 31, 2017)

	One Year	Five Years	Ten Years
Return Before Taxes	15.25%	6.14%	4.05%
Return After Taxes on Distributions	15.00%	4.42%	2.53%
Return After Taxes on Distributions and Sale of Fund Shares	8.84%	3.99%	2.51%
S&P 500® Index (reflects no deduction for fees, expenses, or taxes)	21.83%	15.79%	8.50%
Dow Jones Industrial Average (reflects no deduction for fees, expenses, or taxes)	28.11%	16.37%	9.28%

After-tax returns are calculated using the historically highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown, and after-tax returns are not relevant to investors who hold their Fund shares through tax-deferred arrangements such as 401(k) plans or individual retirement accounts ("IRAs"). The Return After Taxes on Distributions and Sale of Fund Shares is higher than other return figures when a capital loss occurs upon the redemption of Fund shares.

Investment Adviser: First Associated Investment Advisors, Inc.

Portfolio Manager: Curtis A. Teberg has been the portfolio manager of the Fund since its inception. Mr. Teberg is the co-founder of the Adviser and has been its President since its inception in 1988.

Purchase and Sale of Fund Shares: You may purchase and redeem shares of the Fund on any day that the New York Stock Exchange is open for trading. The minimum initial and minimum subsequent investment amounts are shown below:

Type of Account	To Open Your Account	To Add to Your Account
Regular Accounts	\$2,000	\$100
IRAs (Traditional, Roth, SEP, and SIMPLE IRAs)	\$2,000	\$100
Coverdell Education Savings Accounts	\$2,000	\$100
Uniform Gifts/Transfers to Minors Act Accounts	\$2,000	\$100

Tax Information: Dividends and capital gain distributions you receive from the Fund, whether you reinvest your distributions in additional Fund shares or receive them in cash, are taxable to you at either ordinary income or capital gains tax rates unless you are investing through a tax-deferred plan such as an IRA or 401(k) plan. However, these dividend and capital gain distributions may be taxable upon their eventual withdrawal from tax-deferred plans.

Payments to Broker-Dealers and Other Financial Intermediaries: If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

ADDITIONAL INFORMATION ABOUT PRINCIPAL INVESTMENT STRATEGIES AND RELATED RISKS

Investment Objective:

The investment objective of the Fund is to seek to maximize total return (capital appreciation plus income). This objective and the investment strategies described below are non-fundamental, which means that they may be changed by action of the Board of Trustees (herein referred to as the "Board" or "Board of Trustees") without shareholder approval upon 60 days' written notice to shareholders.

Principal Investment Strategies:

The Fund pursues its objective by investing primarily in shares of any number of Underlying Funds. The Underlying Funds purchased by the Fund likely will have certain investment policies and use certain investment practices that may be different from those of the Fund. These other policies and practices may subject the Underlying Funds' (and, by extension, the Fund's) assets to varying or greater degrees of risk. The Adviser selects primarily equity mutual funds that the Adviser believes offer superior prospects for capital growth, attractive high-yield bond mutual funds and money market mutual funds (the Fund reserves the right to invest all of its assets in either equity, fixed-income or money market mutual funds depending upon market conditions). The Adviser uses a "top down" approach to actively select Underlying Funds that begins with an analysis of the general economic outlook. The next step is to analyze historical market patterns with the goal of determining which categories and sectors are likely to perform well in certain economic conditions. Next, the Adviser analyzes the historical returns of a broad universe of mutual funds and selects those that exhibit the potential for superior growth based on factors including, but not limited to, their exposure to risk, historical performance, downside records, and competitive position.

In selecting the Underlying Funds, the Adviser seeks to construct a portfolio of Underlying Funds that invest across the range of the total market, including stocks of domestic and international companies with small, medium and large average capitalizations, and at various times emphasizes either value or growth styles of investing or a combination. The Adviser also seeks to include Underlying Funds that invest in fixed-income securities with varying maturities (e.g., short-term, intermediate or long-term) and credit qualities (e.g., investment grade or lower than investment grade); provided, however, that at any given time up to 80% of the Fund's net assets may be invested in Underlying Funds that invest in high-yield (or "junk bond") securities. The term "investment grade" refers to the credit quality of fixed-income securities as established by a recognized rating agency, such as Standard & Poor's Ratings Group, Moody's Investors Service, Inc., or Fitch, Inc. Securities that are rated lower than investment grade (commonly known as "junk bonds"), or high-yield securities, generally provide high income in an effort to compensate investors for their higher risk of default, which is the failure to make required interest or principal payments. High-yield bond issuers include small or relatively new companies lacking the history or capital to merit investment grade status, former blue chip companies downgraded because of financial problems, companies electing to borrow heavily to finance or avoid takeover or buyout, and firms with heavy debt loads. In addition, although not its primary investment focus, the Fund also may purchase shares of international and global Underlying Funds that invest in securities of companies located outside of the U.S. when they meet the Adviser's selective criteria. Such investments, however, will not comprise more than 5% of the Fund's portfolio at any given time.

The Adviser believes that investing in other mutual funds provides the Fund with opportunities to achieve greater diversification of portfolio securities and investment techniques than the Fund could achieve by investing directly in individual portfolio securities. However, the Adviser believes that the best investment returns can be attained by moving assets into funds that currently exhibit the potential for superior growth within a given asset class or fund category. Continually monitoring and re-balancing the Fund's investments (if necessary) may help ensure that returns are maximized while maintaining diversification to avoid dependence on one area of the market. The Adviser also regularly evaluates the macroeconomics of the categories for shifts that may necessitate a re-evaluation of the entire allocation process. Such trading, however, may result in realization of capital gains that would not otherwise be realized and may also lead to higher transaction costs, which could negatively affect the Fund's performance. The Fund's investment strategy typically results in a high portfolio turnover rate. The Fund cannot accurately predict its future annual portfolio turnover rate. A comparatively high portfolio turnover rate may affect the Fund's performance because it results in higher brokerage commissions, and higher portfolio turnover rates may result in taxable capital gain distributions to the Fund's shareholders. Additionally, there is no limit on, and the Adviser cannot control, the portfolio turnover rates of the Underlying Funds.

The Fund is independent from any of the Underlying Funds in which it invests and has little voice in or control over the investment practices, policies or decisions of those Underlying Funds. If the Fund disagrees with those practices, policies or decisions, it may have no choice other than to liquidate its investment in that Underlying Fund, which may entail losses. An Underlying Fund may limit the Fund's ability to sell its shares of the Underlying Fund at certain times. In these cases, such investments will be considered illiquid and subject to the Fund's overall limit on illiquid securities. For example, no Underlying Fund is required to redeem any of its shares owned by the Fund in an amount exceeding 1% of the Underlying Fund's shares during any period of less than 30 days. As a result, to the extent that the Fund owns more than 1% of an Underlying Fund's shares, the Fund may not be able to liquidate those shares promptly in the event of adverse market conditions or other considerations.

To determine when to sell Underlying Funds, the Adviser analyzes how the general economic outlook could impact certain categories and sectors based on historical market patterns. The Adviser continuously monitors the pricing of each Underlying Fund to identify if it is performing as anticipated, with the goal of selling a fund when it appears to have reached its expected growth potential. The Adviser may sell an Underlying Fund prior to reaching this growth level if the economic outlook changes or it appears that the Underlying Fund is not reacting to current conditions as it has to similar periods in the past.

As a means to pursue its investment objective, the Fund generally intends to limit its investments to shares of Underlying Funds. The Fund may, however, to a limited extent invest its assets directly in securities in lieu of indirect investments through other mutual funds. The Fund's direct investments would remain consistent with its asset allocation strategy and would typically be close or identical to those securities held by one or more of the Underlying Funds in which the Fund currently invests.

The Fund will invest, whenever possible, in Underlying Funds that do not impose up-front sales loads, deferred sales loads, or Rule 12b-1 distribution fees of more than 0.25%. If the Fund invests in an Underlying Fund that charges a sales load, it will use available sales load waivers and quantity discounts to minimize or eliminate the sales load.

As a complement to its primary strategy of investing in mutual funds, the Fund may also purchase shares of other types of investment companies, such as closed-end funds and ETFs, and is currently investing a portion of its assets in ETFs.

Principal Investment Risks:

The following risks may apply to the Fund's direct investments as well the Fund's indirect risks through investing in Underlying Funds.

- *Cash Position Risk:* When the Adviser believes it is appropriate, the Fund may, for extended periods of time, hold all or a portion of its assets in cash or cash equivalents such as money market mutual funds. This could prevent the Fund from achieving its investment objective. For example, should the market advance during this period, the Fund may not participate as much as it would have if it had been more fully invested. To the extent the Fund uses a money market fund for its cash position, there will be some duplication of expenses because the Fund would bear its pro rata portion of such money market fund's advisory fees and operational expenses. Also, the yield paid by a money market fund in which the Fund invests will vary with short-term interest rates. During periods of rising interest rates, such money market fund's yield will tend to be lower than prevailing interest rates.
- *Fixed Income Risk:* Typically, a rise in interest rates causes a decline in the value of fixed income securities. The value of fixed income securities typically falls when an issuer's credit quality declines and may even become worthless if an issuer defaults. Recently, interest rates have been historically low. Current conditions may result in a rise in interest rates, which in turn may result in a decline in the value of the bond investments held by the Fund. As a result, for the present, interest rate risk may be heightened.
- *Industry or Sector Emphasis Risk:* The Fund may invest in Underlying Funds that in turn concentrate their investments within one industry or sector or among a broad range of industries or sectors. To the extent that an Underlying Fund focuses on one or more sectors or industries, it may be subject to the risks affecting that sector or industry more than would a more broadly diversified fund. For example, to the extent that an Underlying Fund concentrates in the technology sector, it will be subject to the risks of that sector, including competitive pressures of technology companies from new market entrances and technological obsolescence, as well as increased research and development costs and potential for greater governmental regulation. Furthermore, each industry or sector possesses particular risks that may not affect other industries or sectors. The Adviser's judgment about which sectors or industries offer the greatest potential for long-term financial reward will change over time. Therefore, the Underlying Funds in which the Fund invests may be concentrated in any of a number of different sectors or industries.
- *Junk Bond Risk:* Lower-quality bonds, known as "high yield" or "junk" bonds, present a significant risk for loss of principal and interest. These bonds offer the potential for higher return, but also involve greater risk than bonds of higher quality, including an increased possibility that the bond's issuer, obligor or guarantor may not be able to make its payments of interest and principal (credit quality risk). If that happens, the value of the bond may decrease, and the Fund's share price may decrease and its income distribution may be reduced. An economic downturn or period of rising interest rates (interest rate risk) could adversely affect the market for these bonds and reduce the Fund's ability to sell its bonds (liquidity risk). Such securities may also include "Rule 144A" securities, which are subject to resale restrictions. The lack of a liquid market for these bonds could decrease the Fund's share price.
- *Management Risk:* The NAV of the Fund changes daily based on the performance of the securities and derivatives in which it invests. The Adviser's judgments about the attractiveness, value and potential appreciation of particular asset classes and securities in which the Fund invests (long or short) may prove to be incorrect and may not produce the desired results.

- *Market Risk:* The NAV of the Fund will fluctuate based on changes in the value of the securities and derivatives in which the Fund invests. The Fund invests in securities and derivatives, which may be more volatile and carry more risk than some other forms of investment. The price of securities and derivatives may rise or fall because of economic or political changes. Security and derivative prices in general may decline over short or even extended periods of time. Market prices of securities and derivatives in broad market segments may be adversely affected by price trends in commodities, interest rates, exchange rates or other factors wholly unrelated to the value or condition of an issuer.
- *Portfolio Turnover Risk:* A higher portfolio turnover will result in higher transactional and brokerage costs associated with the turnover, which may reduce the Fund's return, unless the securities traded can be bought and sold without corresponding commission costs. Active trading of securities will also increase the Fund's realized capital gains or losses, which may affect the taxes you pay as a Fund shareholder. The Fund's portfolio turnover rate is expected to be greater than 100% annually.
- *Small and Medium Capitalization Company Risk:* Securities of small and medium capitalization companies may be subject to more abrupt or erratic market movements than those of larger, more established companies or the market averages in general. These companies may have narrower markets, limited product lines, fewer financial resources, and they may be dependent on a limited management group. Investing in lesser-known, small and medium capitalization companies involves greater risk of volatility of the Fund's NAV than is customarily associated with larger, more established companies. Often smaller and medium capitalization companies and the industries in which they are focused are still evolving and, while this may offer better growth potential than larger, more established companies, it also may make them more sensitive to changing market conditions. Small cap companies may have returns that can vary, occasionally significantly, from the market in general. The securities of many of the companies with small and medium size capitalizations may have less "float" (the number of shares that normally trade) and less interest in the market and therefore are subject to liquidity risk. In addition, high-yield securities generally have more limited trading opportunities than higher credit quality securities, which makes it more difficult to buy or sell a security at a favorable price or time, and therefore they are also subject to liquidity risk. Liquidity risk is the risk that certain securities may be difficult or impossible to sell at the time and price that the Underlying Fund would like to sell. If that happens, an Underlying Fund invested in such securities may have to lower the price, sell other securities instead, or forego an investment opportunity, any of which could have a negative effect on such Underlying Fund's (and, by extension, the Fund's) performance.
- *Underlying Funds Risk:* The Fund invests in ETFs and mutual funds. As a result, your cost of investing in the Fund will be higher than the cost of investing directly in ETFs and mutual funds and may be higher than other mutual funds that invest directly in stocks and bonds. You will indirectly bear fees and expenses charged by the Underlying Funds in addition to the Fund's direct fees and expenses. When the Fund invests in Underlying Funds that use margin, leverage and short sales, an investment in the Fund may be more volatile than investments in other mutual funds. Short sales are speculative investments and will cause the Fund to lose money if the value of a security sold short by the Fund, or an Underlying Fund in which the Fund invests, does not go down as the adviser expects. Additional risks of investing in ETFs and mutual funds, where noted, are described below:
 - *ETF Tracking Risk:* Investment in the Fund should be made with the understanding that the passive ETFs in which the Fund invests will not be able to replicate exactly the performance of the indices they track because the total return generated by the securities will be reduced by transaction costs incurred in adjusting the actual balance of the securities. In addition, the passive ETFs in which the Fund invests will incur expenses not incurred by their applicable indices. Certain securities comprising the indices tracked by the passive ETFs may, from time to time, temporarily be unavailable, which may further impede the passive ETF's ability to track their applicable indices.
 - *Management Risk:* When the Fund invests in Underlying Funds, there is a risk that the investment advisers of those Underlying Funds may make investment decisions that are detrimental to the performance of the Fund.
 - *Mutual Fund Risk:* The strategy of investing in Underlying Funds that are mutual funds could affect the timing, amount and character of distributions to you and therefore may increase the amount of taxes you pay. In addition, certain prohibitions on the acquisition of mutual fund shares by the Fund may prevent the Fund from allocating its investments in the manner the adviser considers optimal. The Fund intends to purchase mutual funds that are either no-load or waive the sales load for purchases made by the Fund. The Fund will not purchase mutual funds that charge a sales load upon redemption, but the Fund may purchase mutual funds that have an early redemption fee. In the event that a mutual fund charges a redemption fee, then you will indirectly bear the expense by investing in the Fund. Investment companies whose shares are purchased by the Fund will be obligated to redeem shares held by the Fund only in an

amount up to 1% of the mutual fund's outstanding shares during any period of less than 30 days. Shares held by the Fund in excess of 1% of an investment company's outstanding shares therefore, may be considered not readily marketable securities, which, together with other such securities, may not exceed 15% of the Fund's total assets. This liquidity risk is reduced, however, as many of the investment companies in which the Fund may invest have a policy of not taking advantage of this 1% threshold and, in fact, go so far as to encourage frequent purchases and redemptions of any size. In addition, certain investment companies have exemptive orders in place that allow the Fund to own up to 25% of the assets of said fund. When the Fund focuses its investments in certain mutual funds, the Fund's portfolio will have a risk profile for such investments that will correspond to that of such mutual funds, and Management Risk, described above, increases proportionately.

- *Net Asset Value and Market Price Risk:* The market value of ETF shares may differ from their NAV. This difference in price may be due to the fact that the supply and demand in the market for fund shares at any point in time is not always identical to the supply and demand in the market for the underlying basket of securities. Accordingly, there may be times when shares trade at a premium or discount to NAV.
- *Strategies Risk:* Each Underlying Fund is subject to specific risks, depending on the nature of the fund. These risks could include liquidity risk, sector risk, and foreign currency risk, as well as risks associated with fixed income securities and commodities.

Non-Principal Risks of Investment

- *Government Obligations Risk:* The Underlying Funds in which the Fund invests may invest in securities issued or guaranteed by the U.S. government, its agencies and instrumentalities. No assurance can be given that the U.S. government will provide financial support to U.S. government-sponsored agencies or instrumentalities where it is not obligated to do so by law.

Temporary Investments: To respond to adverse market, economic, political or other conditions, the Fund may invest 100% of its total assets, without limitation, in high-quality short-term debt securities and money market instruments. These short-term debt securities and money market instruments include: shares of money market mutual funds, commercial paper, certificates of deposit, bankers' acceptances, U.S. Government securities and repurchase agreements. While the Fund is in a defensive position, the opportunity to achieve its investment objective will be limited. Furthermore, to the extent that the Fund invests in money market mutual funds for cash positions, there will be some duplication of expenses because shareholders will pay the fees and expenses of the Fund and, indirectly, the fees and expenses of the underlying money market funds. The Fund may also invest a substantial portion of its assets in such instruments at any time to maintain liquidity or pending selection of investments in accordance with its policies.

Portfolio Holdings Disclosure: A description of the Fund's policies regarding the release of portfolio holdings information is available in the Fund's Statement of Additional Information ("SAI").

Cybersecurity: The computer systems, networks and devices used by the Fund and its service providers to carry out routine business operations employ a variety of protections designed to prevent damage or interruption from computer viruses, network failures, computer and telecommunication failures, infiltration by unauthorized persons and security breaches. Despite the various protections utilized by the Fund and its service providers, systems, networks, or devices potentially can be breached. The Fund and its shareholders could be negatively impacted as a result of a cybersecurity breach.

Cybersecurity breaches can include unauthorized access to systems, networks, or devices; infection from computer viruses or other malicious software code; and attacks that shut down, disable, slow, or otherwise disrupt operations, business processes, or website access or functionality. Cybersecurity breaches may cause disruptions and impact the Fund's business operations, potentially resulting in financial losses; interference with the Fund's ability to calculate its NAV; impediments to trading; the inability of the Fund, the Adviser, and other service providers to transact business; violations of applicable privacy and other laws; regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs; as well as the inadvertent release of confidential information.

Similar adverse consequences could result from cybersecurity breaches affecting issuers of securities in which the Fund invests; counterparties with which the Fund engages in transactions; governmental and other regulatory authorities; exchange and other financial market operators, banks, brokers, dealers, insurance companies, and other financial institutions (including financial intermediaries and service providers for the Fund's shareholders); and other parties. In addition, substantial costs may be incurred by these entities in order to prevent any cybersecurity breaches in the future.

MANAGEMENT

Investment Adviser: First Associated Investment Advisors, Inc., 5161 Miller Trunk Highway, Duluth, Minnesota 55811, serves as investment adviser to the Fund. Subject to the authority of the Board of Trustees, the Adviser is responsible for management of the Fund's investment portfolio. The Adviser is responsible for assuring that investments are made according to the Fund's investment objective, policies and restrictions. The Adviser was established in 1988 for the purpose of advising individuals and institutions. As of March 31, 2018, the Adviser had approximately \$31.3 million in assets under management.

Pursuant to an investment advisory agreement between the Trust, on behalf of the Fund, and the Adviser, the Adviser is entitled to receive, on a monthly basis, an annual advisory fee equal to 1.25% of the Fund's average daily net assets. The Adviser has contractually agreed to waive management fees and to make payments to limit Fund expenses, at least until July 31, 2019, so that the total annual operating expenses (excluding any front-end or contingent deferred loads, brokerage fees and commissions, acquired fund fees and expenses; borrowing costs (such as interest and dividend expense on securities sold short), taxes, and extraordinary expenses, such as litigation expenses (which may include indemnification of Fund officers and Trustees, contractual indemnification of Fund service providers (other than the Adviser))) of the Fund do not exceed 1.75% of the Fund's average daily net assets. The Adviser may request recoupment of previously waived fees and paid expenses from the Fund for three years from the date they were waived or paid, if such recoupment can be achieved within the foregoing expense limits or within the expense limits in place at the time of recoupment, whichever is lower. This agreement may be terminated only by the Board of Trustees, on 60 days' written notice to the Adviser. A discussion regarding the basis for the Board of Trustees' approval of the advisory agreement is available in the Fund's March 31, 2018 annual report to shareholders. For the most recent fiscal year ended March 31, 2018, the Fund incurred advisory fees totaling 0.82% of its average net assets, after waiver.

Portfolio Manager: The Fund is managed on a day to day basis by Curtis A. Teberg (the "Portfolio Manager"). The SAI provides additional information about the Portfolio Manager's compensation, other accounts managed by the Portfolio Manager, and the Portfolio Manager's ownership in the Fund.

Mr. Teberg has been responsible for the Fund's overall day-to-day management since its inception and has been in the investment management business for more than 30 years. He is the co-founder of the Adviser and has been its President since its inception in 1988. From August 1988 to February 2002, Mr. Teberg was a registered representative with Walnut Street Securities, Inc., a securities brokerage firm in St. Louis, Missouri. From February 2002 to April 2011, he was a registered representative with Askar Corp., a securities brokerage firm in Bloomington, Minnesota. Since May 2011, he has been a registered representative with Polar Investment Counsel, Inc., a securities brokerage firm in Thief River Falls, Minnesota. Mr. Teberg holds series 7, 24, and 63 licenses.

HOW SHARES ARE PRICED

Shares of the Fund are sold at NAV. The NAV of the Fund is determined at close of regular trading (normally 4:00 p.m. Eastern Time) on each day the New York Stock Exchange ("NYSE") is open for business. NAV is computed by determining, on a per class basis, the aggregate market value of all assets of the Fund, less its liabilities, divided by the total number of shares outstanding ((assets-liabilities)/number of shares = NAV). The NYSE is closed on weekends and New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. The NAV takes into account, on a per class basis, the expenses and fees of the Fund, including management, administration, and distribution fees, which are accrued daily. The determination of NAV for a share class for a particular day is applicable to all applications for the purchase of shares, as well as all requests for the redemption of shares, received by the Fund (or an authorized broker or agent, or its authorized designee) before the close of trading on the NYSE on that day.

Generally, the Fund's securities are valued each day at the last quoted sales price on each security's primary exchange. Securities traded or dealt in upon one or more securities exchanges (whether domestic or foreign) for which market quotations are readily available and not subject to restrictions against resale shall be valued at the last quoted sales price on the primary exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid ask prices on such exchanges. Securities primarily traded in the National Association of Securities Dealers' Automated Quotation System ("NASDAQ") National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price. Securities that are not traded or dealt in any securities exchange (whether domestic or foreign) and for which over-the-counter market quotations are readily available generally shall be valued at the last sale price or, in the absence of a sale, at the mean between the current bid and ask price on such over-the-counter market. Debt securities not traded on an exchange may be valued at prices supplied by a pricing agent(s) based on broker or dealer supplied valuations or matrix pricing, a method of valuing securities by reference to the value of other securities with similar characteristics, such as rating, interest rate and maturity.

If market quotations are not readily available, securities will be valued at their fair market value as determined using the "fair value" procedures approved by the Board. Fair value pricing involves subjective judgments and it is possible that the fair value determined for a security may be materially different from the value that could be realized upon the sale of that security. The fair value prices can differ from market prices when they become available or when a price becomes

available. The Board has delegated execution of these procedures to a fair value committee composed of one or more officers from each of the (i) Trust, (ii) administrator, and (iii) Adviser. The committee may also enlist third party consultants such as an audit firm or financial officer of a security issuer on an as-needed basis to assist in determining a security-specific fair value. The Board reviews and ratifies the execution of this process and the resultant fair value prices at least quarterly to assure the process produces reliable results.

The Fund may use independent pricing services to assist in calculating the value of the Fund's securities. In addition, market prices for foreign securities are not determined at the same time of day as the NAV for the Fund. Because the Fund may invest in underlying ETFs which hold portfolio securities primarily listed on foreign exchanges, and these exchanges may trade on weekends or other days when the underlying ETFs do not price their shares, the value of some of the Fund's portfolio securities may change on days when you may not be able to buy or sell Fund shares.

In computing the NAV, the Fund values foreign securities held by the Fund at the latest closing price on the exchange in which they are traded immediately prior to closing of the NYSE. Prices of foreign securities quoted in foreign currencies are translated into U.S. dollars at current rates. If events materially affecting the value of a security in the Fund's portfolio, particularly foreign securities, occur after the close of trading on a foreign market but before the Fund prices its shares, the security will be valued at fair value. For example, if trading in a portfolio security is halted and does not resume before the Fund calculates its NAV, the Adviser may need to price the security using the Fund's fair value pricing guidelines. Without a fair value price, short-term traders could take advantage of the arbitrage opportunity and dilute the NAV of long-term investors. Fair valuation of the Fund's portfolio securities can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that fair value pricing policies will prevent dilution of the Fund's NAV by short term traders. The determination of fair value involves subjective judgments. As a result, using fair value to price a security may result in a price materially different from the prices used by other mutual funds to determine net asset value, or from the price that may be realized upon the actual sale of the security.

With respect to any portion of the Fund's assets that are invested in one or more open-end management investment companies registered under the Investment Company Act of 1940, as amended, the Fund's net asset value is calculated based upon the net asset values of those open-end management investment companies, and the prospectuses for these companies explain the circumstances under which those companies will use fair value pricing and the effects of using fair value pricing.

HOW TO PURCHASE SHARES

You may purchase shares of the Fund by sending a completed application form to the following address:

Regular Mail
THE TEBERG FUND
c/o Gemini Fund Services, LLC
PO Box 541150
Omaha, Nebraska 68154

Express/Overnight Mail
THE TEBERG FUND
c/o Gemini Fund Services, LLC
17605 Wright Street, Suite 2
Omaha, Nebraska 68130

The USA PATRIOT Act requires financial institutions, including the Fund, to adopt certain policies and programs to prevent money-laundering activities, including procedures to verify the identity of customers opening new accounts. As requested on the application, you should supply your full name, date of birth, social security number and permanent street address. Mailing addresses containing only a P.O. Box will not be accepted. This information will assist the Fund in verifying your identity. Until such verification is made, the Fund may temporarily limit additional share purchases. In addition, the Fund may limit additional share purchases or close an account if it is unable to verify a shareholder's identity. As required by law, the Fund may employ various procedures, such as comparing the information to fraud databases or requesting additional information or documentation from you, to ensure that the information supplied by you is correct.

Purchase through Brokers: You may invest in the Fund through brokers or agents who have entered into selling agreements with the Fund's distributor. The brokers and agents are authorized to receive purchase and redemption orders on behalf of the Fund. The Fund will be deemed to have received a purchase or redemption order when an authorized broker or its designee receives the order. The broker or agent may set their own initial and subsequent investment minimums. You may be charged a fee if you use a broker or agent to buy or redeem shares of the Fund. Finally, various servicing agents use procedures and impose restrictions that may be in addition to, or different from those applicable to investors purchasing shares directly from the Fund. You should carefully read the program materials provided to you by your servicing agent.

Purchase by Wire: If you wish to wire money to make an investment in the Fund, please call the Fund at 1-866-209-1964 for wiring instructions and to notify the Fund that a wire transfer is coming. Any commercial bank can transfer same-day funds via wire. The Fund will normally accept wired funds for investment on the day received if they are received by the Fund's designated bank before the close of regular trading on the NYSE. Your bank may charge you a fee for wiring same-day funds.

Automatic Investment Plan: You may participate in the Fund's Automatic Investment Plan, an investment plan that automatically moves money from your bank account and invests it in the Fund through the use of electronic funds transfers or automatic bank drafts. You may elect to make subsequent investments by transfers of a minimum of \$100 on specified days of each month into your established Fund account. Please contact the Fund at 1-866-209-1964 for more information about the Fund's Automatic Investment Plan.

The Fund, however, reserves the right, in its sole discretion, to reject any application to purchase shares. Applications will not be accepted unless they are accompanied by a check drawn on a U.S. bank, thrift institutions, or credit union in U.S. funds for the full amount of the shares to be purchased. After you open an account, you may purchase additional shares by sending a check together with written instructions stating the name(s) on the account and the account number, to the above address. Make all checks payable to "The Teberg Fund." The Fund will not accept payment in cash, cashier's checks, money orders, or credit cards. Also, to prevent check fraud, the Fund will not accept third party checks, U.S. Treasury checks, credit card checks or starter checks for the purchase of shares.

Note: Gemini Fund Services, LLC, the Fund's transfer agent, will charge a \$25 fee against a shareholder's account, in addition to any loss sustained by the Fund, for any check returned to the transfer agent for insufficient funds.

When Order is Processed: All shares will be purchased at the NAV per share (plus applicable sales charges, if any) next determined after the Fund receives your application or request in good order. All requests received in good order by the Fund before 4:00 p.m. (Eastern Time) will be processed on that same day. Requests received after 4:00 p.m. will be processed on the next business day.

Good Order: When making a purchase request, make sure your request is in good order. "Good order" means your purchase request includes:

- the name of the Fund;
- the dollar amount of shares to be purchased;
- a completed purchase application or investment stub; and
- check payable to the "The Teberg Fund."

Retirement Plans: You may purchase shares of the Fund for your individual retirement plans. Please call the Fund at 1-866-209-1964 for the most current listing and appropriate disclosure documentation on how to open a retirement account.

HOW TO REDEEM SHARES

Redeeming Shares: The Fund typically expects that it will take up to three business days following the receipt of your redemption request to pay out the redemption proceeds by check or electronic transfer. The Fund typically expects to pay redemptions from cash, cash equivalents, proceeds from the sale of Fund shares, any lines of credit, and then from the sale of portfolio securities. These redemption payment methods will be used in regular and stressed market conditions. You may redeem all or any portion of the shares credited to your account by submitting a written request for redemption to:

Regular Mail
THE TEBERG FUND
c/o Gemini Fund Services, LLC
PO Box 541150
Omaha, Nebraska 68154

Express/Overnight Mail
THE TEBERG FUND
c/o Gemini Fund Services, LLC
17605 Wright Street, Suite 2
Omaha, Nebraska 68130

Redemptions by Telephone: The telephone redemption privilege is automatically available to all new accounts. If you do not want the telephone redemption privilege, you must indicate this in the appropriate area on your account application or you must write to the Fund and instruct it to remove this privilege from your account.

The proceeds will be sent by mail to the address designated on your account or wired directly to your existing account in a bank or brokerage firm in the United States as designated on your application. To redeem by telephone, call 1-866-209-1964.

The Fund reserves the right to suspend the telephone redemption privileges with respect to your account if the name(s) or the address on the account has been changed within the previous 30 days. Neither the Fund, the transfer agent, nor their respective affiliates will be liable for complying with telephone instructions they reasonably believe to be genuine or for any loss, damage, cost or expenses in acting on such telephone instructions and you will be required to bear the risk of any such loss. The Fund or the transfer agent, or both, will employ reasonable procedures to determine that telephone instructions are genuine. If the Fund and/or the transfer agent do not employ these procedures, they may be liable to you for losses due to unauthorized or fraudulent instructions. These procedures may include, among others, requiring forms of personal identification prior to acting upon telephone instructions, providing written confirmation of the transactions and/or tape recording telephone instructions.

Redemptions through Broker: If shares of the Fund are held by a broker-dealer, financial institution or other servicing agent, you must contact that servicing agent to redeem shares of the Fund. The servicing agent may charge a fee for this service.

Redemptions by Wire: You may request that your redemption proceeds be wired directly to your bank account. The Fund's transfer agent imposes a \$15 fee for each wire redemption and deducts the fee directly from your account. Your bank may also impose a fee for the incoming wire.

Automatic Withdrawal Plan: If your individual accounts, IRA or other qualified plan account have a current account value of at least \$10,000, you may participate in the Fund's Automatic Withdrawal Plan, an investment plan that automatically moves money to your bank account from the Fund through the use of electronic funds transfers. You may elect to make subsequent withdrawals by transfers of a minimum of \$50 on specified days of each month into your established bank account. Please contact the Fund at 1-866-209-1964 for more information about the Fund's Automatic Withdrawal Plan.

Redemptions in Kind: The Fund reserves the right to honor requests for redemption or repurchase orders by making payment in whole or in part in readily marketable securities ("redemption in kind") if the amount is greater than the lesser of \$250,000 or 1% of the Fund's assets. The securities will be chosen by the Fund and valued under the Fund's NAV procedures. A shareholder will be exposed to market risk until these securities are converted to cash and may incur transaction expenses in converting these securities to cash.

When Redemptions are Sent: Once the Fund receives your redemption request in "good order" as described below, it will issue a check based on the next determined NAV following your redemption request. The redemption proceeds normally will be sent by mail or by wire within three business days after receipt of a request in "good order." If you purchase shares using a check and soon after request a redemption, your redemption proceeds will not be sent until the check used for your purchase has cleared your bank.

Good Order: Your redemption request will be processed if it is in "good order." To be in good order, the following conditions must be satisfied:

- The request should be in writing, unless redeeming by telephone, indicating the number of shares or dollar amount to be redeemed;
- The request must identify your account number;
- The request should be signed by you and any other person listed on the account, exactly as the shares are registered; and
- If you request that the redemption proceeds be sent to a person, bank or an address other than that of record or paid to someone other than the record owner(s), or if the address was changed within the last 30 days, or if the proceeds of a requested redemption exceed \$50,000, the signature(s) on the request must be medallion signature guaranteed by an eligible signature guarantor.

When You Need Medallion Signature Guarantees: If you wish to change the bank or brokerage account that you have designated on your account, you may do so at any time by writing to the Fund with your signature guaranteed. A medallion signature guarantee assures that a signature is genuine and protects you from unauthorized account transfers. You will need your signature guaranteed if:

- you request a redemption to be made payable to a person not on record with the Trust, on behalf of the Fund;
- you request that a redemption be mailed to an address other than that on record with the Trust, on behalf of the Fund;
- the proceeds of a requested redemption exceed \$50,000;
- any redemption is transmitted by federal wire transfer to a bank other than the bank of record; or
- your address was changed within 30 days of your redemption request.

Signatures may be guaranteed by any eligible guarantor institution (including banks, brokers and dealers, credit unions, national securities exchanges, registered securities associations, clearing agencies and savings associations). Further documentation will be required to change the designated account if shares are held by a corporation, fiduciary or other organization. *A notary public cannot guarantee signatures.*

Retirement Plans: If you own an IRA or other retirement plan, you must indicate on your redemption request whether the Fund should withhold federal income tax. Unless you elect in your redemption request that you do not want to have federal tax withheld, the redemption will be subject to withholding.

Low Balances: If at any time your account balance in the Fund falls below \$250, the Fund may notify you that, unless the account is brought up to at least \$250 within 60 days of the notice; your account could be closed. After the notice period, the Fund may redeem all of your shares and close your account by sending you a check to the address of record. Your account will not be closed if the account balance drops below \$250 due to a decline in NAV.

FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES

The Fund discourages and does not accommodate market timing. Frequent trading into and out of the Fund can harm all Fund shareholders by disrupting the Fund's investment strategies, increasing Fund expenses, decreasing tax efficiency and diluting the value of shares held by long-term shareholders. The Fund is designed for long-term investors and is not intended for market timing or other disruptive trading activities. Accordingly, the Board of Trustees has approved policies that seek to curb these disruptive activities while recognizing that shareholders may have a legitimate need to adjust their Fund investments as their financial needs or circumstances change. The Fund currently uses several methods to reduce the risk of market timing. These methods include, but are not limited to, committing staff to review, on a continuing basis, recent trading activity in order to identify trading activity that may be contrary to the Fund's Market Timing Trading Policy.

Though these methods involve judgments that are inherently subjective and involve some selectivity in their application, the Fund seeks to make judgments and applications that are consistent with the interests of the Fund's shareholders.

Based on the frequency of redemptions in your account, the Adviser or transfer agent may in its sole discretion determine that your trading activity is detrimental to the Fund as described in the Fund's Market Timing Trading Policy and elect to (i) reject or limit the amount, number, frequency or method for requesting future purchases into the Fund and/or (ii) reject or limit the amount, number, frequency or method for requesting future exchanges or redemptions out of the Fund.

The Fund reserves the right to reject or restrict purchase requests for any reason, particularly when the shareholder's trading activity suggests that the shareholder may be engaged in market timing or other disruptive trading activities. Neither the Fund nor the Adviser will be liable for any losses resulting from rejected purchase orders. The Adviser may also bar an investor who has violated these policies (and the investor's financial adviser) from opening new accounts with the Trust, on behalf of the Fund.

Although the Fund attempts to limit disruptive trading activities, some investors use a variety of strategies to hide their identities and their trading practices. There can be no guarantee that the Fund will be able to identify or limit these activities. Omnibus account arrangements are common forms of holding shares of funds. While the Fund will encourage financial intermediaries to apply the Fund's Market Timing Trading Policy to their customers who invest indirectly in the Fund, the Fund is limited in its ability to monitor the trading activity or enforce the Fund's Market Timing Trading Policy with respect to customers of financial intermediaries. For example, should it occur, the Fund may not be able to detect market timing that may be facilitated by financial intermediaries or made difficult to identify in the omnibus accounts used by those intermediaries for aggregated purchases, exchanges and redemptions on behalf of all their customers. More specifically, unless the financial intermediaries have the ability to apply the Fund's Market Timing Trading Policy to their customers through such methods as implementing short-term trading limitations or restrictions and monitoring trading activity for what might be market timing, the Fund may not be able to determine whether trading by customers of financial intermediaries is contrary to the Fund's Market Timing Trading Policy. Brokers maintaining omnibus accounts with the Trust on behalf of the Fund have agreed to provide shareholder transaction information to the extent known to the broker to the Fund upon request. If the Fund or its transfer agent or shareholder servicing agent suspects there is market timing activity in the account, the Fund will seek full cooperation from the service provider maintaining the account to identify the underlying participant. At the request of the Adviser, the service providers may take immediate action to stop any further short-term trading by such participants.

TAX STATUS, DIVIDENDS AND DISTRIBUTIONS

Any sale or exchange of the Fund's shares may generate tax liability (unless you are a tax-exempt investor or your investment is in a qualified retirement account). When you redeem your shares you may realize a taxable gain or loss. This is measured by the difference between the proceeds of the sale and the tax basis for the shares you sold. (To aid in computing your tax basis, you generally should retain your account statements for the period that you hold shares in the Fund.)

The Fund intends to distribute substantially all of its net investment income and net capital gains annually in December. Both distributions will be reinvested in shares of the Fund unless you elect to receive cash. Dividends from net investment income (including any excess of net short-term capital gain over net long-term capital loss) are taxable to investors as ordinary income, while distributions of net capital gain (the excess of net long-term capital gain over net short-term capital loss) are generally taxable as long-term capital gain, regardless of your holding period for the shares. Any dividends or capital gain distributions you receive from the Fund will normally be taxable to you when made, regardless of whether you reinvest dividends or capital gain distributions or receive them in cash. Certain dividends or distributions declared in

October, November or December will be taxed to shareholders as if received in December if they are paid during the following January. Each year the Fund will inform you of the amount and type of your distributions. IRAs and other qualified retirement plans are exempt from federal income taxation until retirement proceeds are paid out to the participant.

Your redemptions, including exchanges, may result in a capital gain or loss for federal tax purposes. A capital gain or loss on your investment is the difference between the cost of your shares, including any sales charges, and the amount you receive when you sell them.

On the account application, you will be asked to certify that your social security number or taxpayer identification number is correct and that you are not subject to backup withholding for failing to report income to the IRS. If you are subject to backup withholding or you did not certify your taxpayer identification number, the IRS requires the Fund to withhold a percentage of any dividend, redemption or exchange proceeds. The Fund reserves the right to reject any application that does not include a certified social security or taxpayer identification number. If you do not have a social security number, you should indicate on the purchase form that your application to obtain a number is pending. The Fund is required to withhold taxes if a number is not delivered to the Fund within seven days.

This summary is not intended to be and should not be construed to be legal or tax advice. You should consult your own tax advisers to determine the tax consequences of owning the Fund's shares.

DISTRIBUTION OF SHARES

Distributor: Northern Lights Distributors, LLC, 17605 Wright Street Omaha, Nebraska 68130, is the distributor for the shares of the Fund. Northern Lights Distributors, LLC is a registered broker-dealer and member of the Financial Industry Regulatory Authority, Inc. ("FINRA"). Shares of the Fund are offered on a continuous basis.

Distribution Fees: The Trust, on behalf of the Fund, has adopted the Trust's Master Distribution and Shareholder Servicing Plan (the "Plan") under Rule 12b-1, pursuant to which the Fund pays the Fund's distributor an annual fee for distribution and shareholder servicing expenses of 0.25% of the Fund's average daily net assets for distribution and shareholder servicing expenses. Because these fees are paid out of the Fund's assets on an on-going basis, over time these fees will increase the cost of your investment and may cost you more than paying other types of sales charges.

The Fund's distributor and other entities are paid under the Plan for services provided and the expenses borne by the distributor and others in the distribution of Fund shares, including the payment of commissions for sales of the shares and incentive compensation to and expenses of dealers and others who engage in or support distribution of shares or who service shareholder accounts, including overhead and telephone expenses; printing and distribution of prospectuses and reports used in connection with the offering of the Fund's shares to other than current shareholders; and preparation, printing and distribution of sales literature and advertising materials. In addition, the distributor or other entities may utilize fees paid pursuant to the Plan to compensate dealers or other entities for their opportunity costs in advancing such amounts, which compensation would be in the form of a carrying charge on any un-reimbursed expenses.

Additional Compensation to Financial Intermediaries: The Fund's distributor, its affiliates, and the Adviser and its affiliates may, at their own expense and out of their own assets including their legitimate profits from Fund-related activities, provide additional cash payments to financial intermediaries who sell shares of the Fund or assist in the marketing of the Fund. Financial intermediaries include brokers, financial planners, banks, insurance companies, retirement or 401(k) plan administrators and others. These payments may be in addition to the Rule 12b-1 fees and any sales charges that are disclosed elsewhere in this Prospectus. These payments are generally made to financial intermediaries that provide shareholder or administrative services, or marketing support. Marketing support may include access to sales meetings, sales representatives and financial intermediary management representatives, inclusion of the Fund on a sales list, including a preferred or select sales list, or other sales programs. These payments also may be made as an expense reimbursement in cases where the financial intermediary provides shareholder services to Fund shareholders. The distributor may, from time to time, provide promotional incentives to certain investment firms. Such incentives may, at the distributor's discretion, be limited to investment firms who allow their individual selling representatives to participate in such additional compensation.

Householding: To reduce expenses, the Fund mails only one copy of a Prospectus and each annual and semi-annual report to those addresses shared by two or more accounts. If you wish to receive individual copies of these documents, please call the Fund at 1-866-209-1964 on days the Fund is open for business or contact your financial institution. The Fund will begin sending you individual copies thirty days after receiving your request.

FINANCIAL HIGHLIGHTS

The following financial highlights table is intended to help you understand the Fund's financial performance for the past five years. Certain information reflects financial results for a single Fund share. The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in the Fund (assuming reinvestment of all dividends and distributions). The information has been audited by Tait, Weller & Baker LLP, whose report, along with the Fund's financial statements, are included in the Fund's annual report. The annual report is available upon request.

The Table below sets forth financial data for one share of beneficial interest throughout each year presented

	Year Ended March 31, 2018	Year Ended March 31, 2017	Year Ended March 31, 2016	Year Ended March 31, 2015	Year Ended March 31, 2014
Net asset value, beginning of year	\$ 10.20	\$ 9.24	\$ 11.55	\$ 10.91	\$ 10.41
Income from investment operations:					
Net investment income/(loss) ^(1,2)	0.07	0.11	(0.06)	(0.01)	0.15
Net realized and unrealized gain/(loss) on investments	0.96	0.85	(1.21)	1.32	0.58
Total from investment operations	1.03	0.96	(1.27)	1.31	0.73
Less distributions:					
From net investment income	(0.10)	—	—	(0.03)	(0.23)
From net realized gain	—	—	(1.04)	(0.64)	—
Total distributions	(0.10)	—	(1.04)	(0.67)	(0.23)
Net asset value, end of year	\$ 11.13	\$ 10.20	\$ 9.24	\$ 11.55	\$ 10.91
Total return ⁽³⁾	10.12%	10.39%	(11.68)%	11.75%	7.03%
Ratios/supplemental data:					
Net assets, at end of year (000s)	\$ 29,816	\$ 29,464	\$ 30,916	\$ 35,753	\$ 33,182
Ratio of expenses to average net assets ⁽⁴⁾ :					
Before expense waiver	2.18%	2.14%	2.08%	2.06%	2.06%
After expense waiver	1.75%	1.75%	1.75%	1.75%	1.75%
Ratio of net investment income/(loss) to average net assets ^(1,4) :					
Before expense waiver	0.22%	0.70%	(0.88)%	(0.36)%	1.08%
After expense waiver	0.65%	1.10%	(0.55)%	(0.05)%	1.40%
Portfolio Turnover Rate	41.03%	101.03%	332.00%	362.20%	303.65%

- (1) Recognition of net investment income by the Fund is affected by the timing of the declaration of dividends by the underlying investment companies in which the Fund invests.
- (2) Per share amounts calculated using the average shares method, which more appropriately presents the per share data for the period.
- (3) Total return assumes reinvestment of all dividends and distributions, if any.
- (4) Does not include expenses of investment companies in which the Fund invests.

PRIVACY NOTICE

FACTS	WHAT DOES NORTHERN LIGHTS FUND TRUST III DO WITH YOUR PERSONAL INFORMATION?
--------------	--

Why?	Financial companies choose how they share your personal information. Federal law gives consumers the right to limit some but not all sharing. Federal law also requires us to tell you how we collect, share, and protect your personal information. Please read this notice carefully to understand what we do.
-------------	--
